Title :

Worktop Extension Flap Retrofit Instruction

Document Ref:

STD-FI-2025-0001

Initial Release Date :

02/01/2025

Ranges Affected :

PX1, PXR, PX2, PS6, PSR, PG2 & DYR

Models Affected :

All

Please follow the steps below to fit a kitchen worktop extension flap on relevant models.

NOTE: not all models in the ranges can have this fitted - details on the last page.

Parts :

	2x Spring Hinged Bracket		4x Self Tapping Screw 10x1/2
	4x Wood Screw 5x5/8		1x Extension Flap (Model Specific)

Tooling :

	Screwdriver & PZ2 bit		Tape Measure
---	-----------------------	--	--------------

Step	Operation Description :	Photo :
1	Fix the 2x spring hinge brackets to the underside of the worktop using 4x 5x5/8 screws provided. Ensure the hinges are oriented with the upright part of the hinge at the rear of the worktop (which is the flat edge of the worktop)	

Op.	Operation Description :	Photo :
2	There are 4x pilot holes in the worktop which correspond to the holes on the hinges as shown here.	
3	Once the hinges fitted to the worktop, the assembly should look like this (viewed upside down)	
4	<p>Turn the assembly over, align the extension worktop level with the main kitchen worktop and fix the assembly to the side of the kitchen unit using 4x 10x1/2 screws.</p> <p>NOTE: it may be necessary to have one person hold the assembly in place whilst another fixes the screws.</p> <p>Most models have a hollow panel with timber frame structure. There are designated timber supports built in to allow fitment of this extension flap.</p> <p>NOTE: Check the diagrams on the last page for help locating the support timbers.</p>	
5	<p>Installation is now complete.</p> <p>The worktop can be folded down when not in use as per this photo.</p>	

Op.	Operation Description :	Photo :
EX	<p>The L/H kitchen panel has support timber built in specifically to fit this extension flap.</p> <p>See table below for model specific dimensions.</p> <p>To find the supports measure the dimensions from the front edge (green line).</p> <p>Measure XXX (from the green line to the red line) for the R/H bracket.</p> <p>Measure XXX (from the green line to the blue line) for the L/H bracket.</p> <p>These are the measurements to the centre of each support but 5mm in either direction will still find the supports.</p> <p>NOTE: SOLID indicates the panel is solid wood so the hinges can be screwed in any position on the panel.</p> <p>NOTE: N/A indicates the kit cannot be fitted to that model.</p>	

Range		Models	Distance Between Hinges	RED	BLUE
PX1	Phoenix	420	N/A	N/A	N/A
PX1	Phoenix	440, 640, 642, 644, 760	320mm	60mm	350mm
